Year 2000 in Schools

Dealing with the millennium bug

Let the millennium bug? Even the year 2000 is not a problem for your school prepared? Computer most explores the technology issues of the year, and points to the advice for a cure.

The millennium bug or Y2K 2000 is a problem for many people and people because a billion years passed - but more worrying is that it might affect financial systems or even the planes in the sky.

For a school, there are implications for any electronic device that processes dates. This includes the computers that handle entries and student records. It also includes fax machines, photocopiers, security systems and many other devices found in the school.

It may be a problem for you. It is more a problem for your school prepared? Computer most explores the technology issues of the year, and points to the advice for a cure.
